Trucking charges can be computed in advance by using the zone map and schedule. For example: delivering a \$500.00 order to Philadelphia, in zone 2 would cost 2½% of order or \$12.50. Further data for deliveries not covered by chart furnished on request.

CREDIT, TERMS AND CASH DISCOUNTS

We are glad to extend credit on the basis of our regular terms to established nurserymen who are known to us, or are rated satisfactorily. Cash before shipment is required from parties unknown to us, who have no commercial rating.

Terms: On basis of these low net prices we will allow 10%-10 days, 2%-30 days from date of invoice, 60 days net, unless otherwise arranged on acceptance of order. Interest at 6% will be charged on all accounts from due date.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

PRICES

Prices are F.O.B. Kingston, N.J., and no boxing or packing charges will be made for stock in full carload lots.

NOTES IN EXPLANATION OF CATALOGUE

The figures following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent and allowance for this has been made in the heights given here.

We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2-3', 10c 3-4', 15c 4-5', 20c 5-6', 25c 6-8', 30c 8-10', 40c

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

¶Reservations of specimen plants—For an additional 25% customers will be permitted to select and reserve specimen plants in the nursery blocks for future delivery.

Quantities of 5, 25 and 250 will be sold at the ten, hundred, and thousand rate, respectively.

NEW HARDY EVERGREEN BERBERIS

We have a good assortment of these new varieties which are very attractive in both dark green, holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad-leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the Winter months. Under favorable conditions most of them will attain a height of about six feet.

gagnepaini. Has long and very narrow, holly-like leaf.

julianae. Fairly rapid growth with broader, spined leaves.

laevis. Similar to *julianae*.

sargentii. Leaves very lightly spined, otherwise similar to *julianae* in habit.

triacanthophora. Rapid grower, dense habit and small, lightly-spined leaves.

**FRENCH LILACS—NAMED VARIETIES
ALL ON OWN ROOTS**

These are all grown from cuttings and are on their OWN ROOTS, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs generally grow from 6 to 12 ft. in height, depending on the variety and locality.
